Wilson's Reply Concerning Ship- Teutonic Allies Will Strike ment of War Munitions.

United States Adhering to a Principle Upon Which It Would Depend For Munitions In the World's Markets In Case It Should Be Attacked by a Foreign Power-Review of the American Note.

Washington, Aug. 16.-Austria-Hungary and Germany now know officially that there is no hope of the United

ommunication is in the form of a rewar munitions, and sets forth the atadier general. He was born in New- firmly. Austria is notified that this government will not even consider acceding to her request. So strong is ria railroad were killed near Mount the stand taken by the Washington government that this note not only changes, but will operate, officials believe, as a check upon the sentiment developing in this country in favor of an embargo.

While President Wilson in this note, as in all others to European governments on the war issues takes his stand firmly upon the principles involved and upon the usage of nations, be introduces another feature which by many is regarded as the most striking feature of the note. The president bases his refusal to consider the Austrian suggestion on the practical President Rutherford B. Hayes, has grounds of its effect upon the ability of the United States to meet a foe in the event of war. This government tells Austria that it has been the policy of the United States from the tain in time of peace a large military establishment or stores of arms and has, in fact, always depended upon the ammunition from neutral nations in

case of foreign attack. In citing the domestic policy against militarism the American note makes this remarkably frank acknowledg-

"In consequence of this standing policy the United States would in the event of attack by a foreign power be at the outset of the war seriously if not fatally embarrassed by the lack of arms and ammunition and by the means to produce them in sufficient quantities to supply the requirements of national defense."

The statement to one of the large European powers that the United States might be "fatally" embarrassed at the outset of a war caused more of a stir in Washington than any other

feature of the note. The president makes it clear to Austria, and through her to Germany, Balkan bubble will break. that to accept the suggestion that a neutral ought to prohibit the sale of arms and ammunitions to belligerents von BUELOW DEFEATS not only would be repudiating the policy by which this government has always stood, but would be compelling every nation, including the United States, to have in readiness at all times sufficient munitions of war to gressive and a better prepared enemy. In other words, the acceptance of the Teutonic proposals would be to turn the world into an armed camp, promote militarism and retard the move-

ment for universal peace. In advancing this argument the resident clearly was aiming at the embargo movement in this country as check the movement that is gaining embargo on war munitions as an act of reprisal against Great Britain. The 2,000 prisoners. embargo movement has had the support of peace societies. Some officials in Washington have an idea, too, that the note was written with the national defense issue in mind, and for the purpose of calling impressively to the attention of the country the fact that this country is dependent upon other meet a crisis.

side or the other. During the last few days no news to speak of respecting the Balkan situuation has been allowed to pass the censor in Germany or Austria. This fact is in itself great when viewed from the usual Teutonic silence that recedes a storm. It is not considered likely that the situation at the Dardanelles will permit of long delay in the prospective German drive through Servia, even though political and diplomatic motives should dictate the wisdom of watchful waiting. Consequently the English military critics of the Teutons, with the certainty that as soon as the Germanic allies have begun their invasion of Servia the entire

# AUSTRIA'S CLAIM! BELGRADE UNDER DISALLOWED

ment of War Munitions.

United States Adhering to a Principle Upon Which It Would Depend For Munitions In the World's Markets In Case It Should Be Attacked by a Foreign Power-Review of the

Washington, Aug. 16.-Austria-Hungary and Germany now know officially that there is no hope of the United

American Note.

department has sent to Austria and business being done by Americans in war munitions, and sets forth the attitude of this government clearly and firmly. Austria is notified that this government will not even consider acceding to her request. So strong is the stand taken by the Washington government that this note not only will probably end the diplomatic exchanges, but will operate, officials believe, as a check upon the sentiment developing in this country in favor of

an embargo. While President Wilson in this note. as in all others to European governstand firmly upon the principles involved and upon the usage of nations, be introduces another feature which by many is regarded as the most striking feature of the note. The president bases his refusal to consider the Austrian suggestion on the practical grounds of its effect upon the ability of the United States to meet a foe in tells Austria that it has been the policy of the United States from the inding of the republic not to maintain in time of peace a large military establishment or stores of arms and ammunition; that the United States has, in fact, always depended upon the

case of foreign attack. In citing the domestic policy against militarism the American note makes this remarkably frank acknowledg-

"In consequence of this standing policy the United States would in the event of attack by a foreign power be at the outset of the war seriously if not fatally embarrassed by the lack of arms and ammunition and by the means to produce them in sufficient quantities to supply the requirements

of national defense.' The statement to one of the large European powers that the United States might be "fatally" embarrassed at the outset of a war caused more of a stir in Washington than any other

feature of the note. The president makes it clear to Austria, and through her to Germany, that to accept the suggestion that a neutral ought to prohibit the sale of arms and ammunitions to belligerents not only would be repudiating the policy by which this government has always stood, but would be compelling every nation, including the United States, to have in readiness at all times sufficient munitions of war to gressive and a better prepared enemy In other words, the acceptance of the Teutonic proposals would be to turn the world into an armed camp, promote militarism and retard the move-

ment for universal peace. In advancing this argument the resident clearly was aiming at the embargo movement in this country as reply to Austria in an attempt to check the movement that is gaining embargo on war munitions as an act of reprisal against Great Britain. The embargo movement has had the support of peace societies. Some officials in Washington have an idea, too, that the note was written with the national defense issue in mind, and for the purpose of calling impressively to the attention of the country the fact that

SAY! Did you ever burst right and he bowed lower. Hep slipped into Bohemia and with the aid him another little map of the mint and of a complaining pocketbook try H. W.'s forehead scraped the floor. to Help yourself to a Hilarious eve-

Tag me-I'm It. Of course, I don't mean Bohemia in the highbrow sense-nix. Not one of those quaint retreats with the lemoncolored atmosphere where sad-eyed Artistic Temperaments foregather to chop spaghetti with a fork and bark hand-made repartee at each other over

a beaker of absinthe-nix. I mean the Bohemia so called by the Buyer from Max Plahn's Universal Emporium, Waukesha, Wis., who hits New York along in August and leaves the imprint of his sandals all over Longacre Square and adjacent by-

The Bohemia, so called, which is composed of incandescent lights disguished as rosebuds; Bulgarian waiters disguised as second-story workers, and a menu card which, without any disguise, leads the unwary directly to a Petition in Bankruptcy.

Ever since we've been back in New York, Peaches has been Handing out Hints that she'd like to have me take her over the hurdles into that Fair Land where rag-time and breaded pork chops do a sister act-to one of those real devilish New York Cabarets. Rub his ankles, Doctor; the blood

has rushed to his Bean! I tried to explain to friend wife that the Cabaret is an institution invented solely for the purpose of giving hiccups to Gold-plated Strangers, but Peaches was strong for a Peek at the Night-Life of New York and it was up to me to furnish the opera

She wanted to know if I thought she could toy with a tenderloin steak in some Musical Soup-House without having a policeman call her by her

I told her I was away on sick leave the morning Cabaret Etiquette had

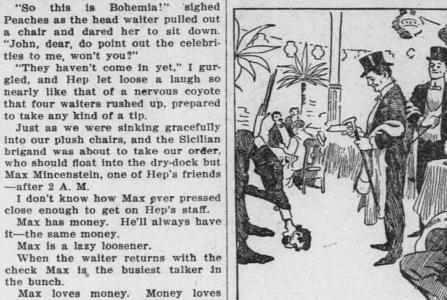

He was the night-watchman of an apartment house uptown, but I gave her an easy speech to the effect that he was Bill Mendelssohn, a grandson of old man Mendelssohn, who once wrote a wedding march so carelessly that it is now used as a coon song. She gasped and gurgled with de-light—in Bohemia and having the time

of her young life, so I let her dream. In the meantime Hep, with a bucket of wine, was busy trying to put out the fire in the well Max used as a

Every time a waiter looked at our table Hep's roll would blaze up. Peaches presently concluded she'd broaden out a bit on Art and the Old Masters, so she asked Max if he liked Rembrandt.

Max looked at her out of the corner of his eye and murmured. "Much bliged, but I'm up to here now!" Then he pointed at his Adam's Apple and fell asleep.

Hep was beginning to see double. Every once in a mile he'd stop humming "Here Comes My Daddy Now-

"The H. W.'s Forehead Scrapped the Floor."

I spoke his name rapidly when I in-Papa, Papa, Papa, Papa!" then he'd troduced Max to Peaches, but as she close one eve and with the other look was busy trying to lead a swift life over at Peaches and hand her a sad sweet smile

didn't make much difference what I Hep must have been sitting over a trapdoor, because suddenly wine-coolers began to festoon themselves hands, while Max, the genial pest, around about him. Blue wine-coolers with his chin driven through his shirtappeared at his right, magenta winefront, was over on Dream Avenue, coolers at his left, and ice, drift ice about to hitch up his favorite nightmare and take a spin through Bug-

> Peaches was toying with a spoonful of consomme Julienne and I was parleying shoestring potatoes back on my fork, when suddenly there came a great clanging of bells, doors rattled and banged, women screamed and the orchestra fell out of a back window -all except the bass fiddle. He fell in a bowl of soup left for him by an bliging but hurrying waiter.

> Max woke up suddenly, looked about wild-eyed and slid gracefully under the table. Hep, with a roll of bills in each

universe, but he toppled over among the wine-coolers and passed peaceful ly away again in cold storage. A fat man with a beard and a dia lect ran around in circles exclaiming

Then he rushed over to our table and yelled, "Get out! Get out!" "Why should we get out?" I in-

quired, placing a piece of fried chicken tenderly in his outstretched hand. Because it's closing up time and always forget about it. The police have to come and remind me." Then he threw the fried chicken

I looked in the direction of the door. Yes, there they were—an Army Corps of Cops, marching steadily forward

into the Palace of Pies, fearless in the face of danger It was a brave sight to see them deploy by fours and reaching forward with their nightsticks knock a hunk of

beefsteak out of a hungry diner's I grabbed Peaches by the elbow

and we beat it from Bohemia while the beating was good. The last I saw of Max he was acting as a foot-rest for the General com manding the Fifth Brigade, while He slept peacefully on amid the up-turned

wine-coolers and the ice-floes. Bohemia, eh? So this is what they call Having A Good Time in New York! Mr. Umpire, I called you Bad names

Lesson VIII.—Third Quarter, For Aug. 22, 1915.

THE INTERNATIONAL SERIES.

ext of the Lesson, II Chron. xv, 1-15. Memory Verses, 1, 2-Golden Text, Jas. iv, 8-Commentary Prepared by

mple of all the kings of the ten ribes, for there was not a good king nong them. They all walked in the vays of Jeroboam, son of Nebat, who ade Israel to sin. There were a few just eight, I think-among the kings of Judah who did right in the eyes of the Lord, and Asa of today's lesson ras one of them (verses 1, 2). His father, Abijah, son of Rehoboam, reigned only three years (xiii, 1, 2). The Lord gave him and his army a victory ever he army of Jeroboam because they relied upon the Lord God of their fathers (xiii, 12, 18). His words in xiii, 12, are always helpful-"Behold, God (I Kings xv, 8-24), it occupies three chapters in Chronicles (xiv, xv, xvi). the first two telling of his thirty-five the last telling of five years of disobe dience. What a pity that such a good from God! But such always is man when he turns away from God. We cannot think of Asa as a lost man, though he acted so badly at the last but he lost part of the full reward which might have been his (II John 8; I Cor. iii, 11-15).

Quietness and rest on every side and a whole hearted seeking, the Lord God marked the first ten years or more of his reign (xiv, 1-7; xv, 12-15). Such rest and peace and quietness is the privilege of every true believer, and when He giveth quietness who then can make trouble whether in the case of a nation or a man only (Job xxxiv, 29). It is our privilege thus to foretaste the kingdom when the work of righteousness shall be peace, and the effect or service of righteousness quietss and assurance forever (Isa. xxxii, . 17). The same Lord is ever saying to all, "Come unto me, \* \* \* and I will give you rest" (Matt. xi, 28-30), and it is written, "We who have believed do enter into rest" (Heb. iv, 3). The great adversary hates peace always, and so stirred up the Ethiopians with an army of over a million to go against Asa, who had only about half as many rable prayer of chapter xiv, 11, so brief yet so comprehensive, which has helped me many a time, and will prove a comfort and strength to all who appro-

Every day and hour we should say "We rest on Thee, and in Thy name we go." Compare part of the prayer of Jehoshaphat in chapter xx, 12, which we may also continually appropriate. Although the Ethiopians were such a huge host, yet because Asa relied on the Lord He delivered them into his hand, for the eves of the Lord run to and fro throughout the whole earth to show Himself strong in the behalf of (or as in the margin, strongly to hold with) them whose heart is perfect (or whole) toward Him (chapter xvi, 8, 9). This ninth verse is and has been for long years a continual strength and comfort to me and is working in me an increasing desire to have a whole heart for Him, and to see no one save Jesus only. The Spirit of God brought a message of encouragement to Asa by Azariah, whose name means the strength of Jehovah, which is found in lesson verses 1-7, and the exhortation lesson verses 1-8, in verse 7 is for us also who believe, "Be ye strong, therefore, and let not your hands be weak, for your work shall be rewarded." Salvation is never of works, but always to him that worketh not but believeth (Rom. iv, 5); but we are thus saved by grace in order to serve the Living and True God, and all true service unto Him shall be rewarded (Luke xiv, 14; Rev. xxii, 12;

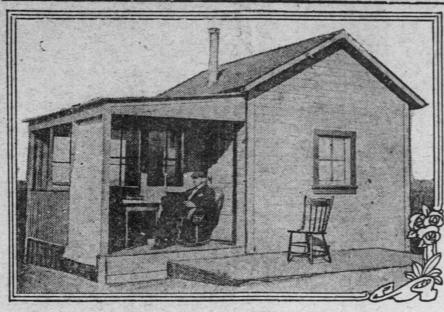

Eph. vi, 10, "Be strong in the Lord Bryan said: and in the power of His might." Asa, being thus encouraged, cleansed the land of idols, even destroying that of his own mother, but this cleansing was chiefly in Judah and Benjamin, many of the high places still remaining in Israel, over which he had no control; steadily. and yet many out of Ephraim, and Manasseh, and Simeon, and other tribes fell to him in abundance when they him: all because he was seeking the Lord with all his heart and soul (verses 8-15). They also renewed the altar and offered sacrifices, and there was no more war until the thirty-fifth year of his reign. But the next year the king of Israel came against him, he made a league with the king of minded Asa how the Lord had wrought marvelously for him against the Ethiopians because he relied upon Him and how foolishly he had now acted by relying upon the king of Syria (xvi, 7-9). Asa, being out of fellowship with the Lord, gave place to the devil, became angry with the seer, and put him in prison and oppressed some of the people (xvi, 10). Near the close of his reign he became greatly diseased in his feet, but in this also he turned away

from the Lord to purely human help. Brakeman Was Cured

F. A. Wootsey, a railroad brakeman of Jacksonville, Texas,, writes: I was down with kidney trouble and rheu matism so bad I could hardly get up when took some and after a short time I was thoroughly cured and am having no more trouble." They act promptly and help kidneys throw poisonous waste

Home Care of Consumption

ellow? Then here is help for you.

THE STATE TUBERCULOSIS COMMISSION AT THE CAPITOL

While the story of Asa is told in part BUILDING, FRANKFORT, HAS PREPARED A BOOK ON THE HOME CARE OF CONSUMPTION WHICH IT WILL SEND ON REQUEST FREE TO ANY CONSUMPTIVE OR TO ANY PHYSICIAN OR HEALTH OFFI-CER IN THE STATE. THIS BOOK WILL NOT TAKE THE PLACE OF THE PHYSICIAN IN ANY CASE. IT IS INTENDED TO HELP THE DOCTOR AND THE PATIENT.

The book gives helpful suggestions about how to use fresh air; how to prepare attractive dishes for the patient; how to protect the family, so that the ease will not spread to others. Prominent physicians, nurses and social waste his later years in wandering workers have written and approved the book. Any one who needs the book can secure a copy by writing the Commission at its office in Frankfort.

#### OUR PUBLIC FORUM

G. E. Cassel On Railroads Co-operating With the Farmer

Co-operation is a theme that lends itself most readily to theory but yields stubbornly to practice. It is easy to speak the word but difficult to understand it and more difficult still to practice it. All can be selfish but it takes vision to be progressive. The organized farmer has been preaching co-operation for lo! these many years, but now come the railroads talking co-operation in the language

A recent paper read by G. E. Cassel, publicity agent of the Norfolk & Western railway, is so full of horse sense that we reproduce it in part and urge the farmers along that roadway to continued co-operation with the manage-

"We are now dealing with two of the most gigantic occupations of men-farming and land transportation. They are the basis of pretty nearly all When they fail the whole country fails. Therefore, how important it is that these two should fully understand each other, and work together not only for their own commercial advancement but for the prosperity of the "The farmers and the railways are natural allies in all their interests.

It is difficult to conceive of greater service to the commonwealth than that of firmly fixing in the minds of both the railways and the farmers that they men, but Asa cried unto the Lord his are mutually dependent and that the prosperity of one depends on the pros-God in the words of that ever memo-perity of the other, but that suspicion and misunderstanding destroy the lany of the most progressive and far-seeing railways have fully recognized this relation and dependence. "In the study of economic conditions in all branches of human endeavor, that should be prohibited on the from the birth of our nation down to within quite recent years, we are astonished at the utter lack of the co-operative principle—the 'work together' idea—and not only that, but extreme selvishness and purblind prejudice has

more apparently dominated in the different branches of trade and other ave- the annual conference of the M. E. nues of enterprise. This was a condition that government could not remedy. No statute law, or even written constitution, can do more than safeguard those inalienable rights of the individual. "The mutual advantages of co-operation and sympathetic understanding are many and varied for both the railway and the farmer. The farmer is peculiarly dependent upon rapid and cheap transportation. His products will be in attendance. are always comparatively bulky and frequently perishable. The railways give farmers a worldwide market for their products. An intelligent understanding of the fundamental improvement of railway transportation is essen-

tial to the prosperity of any agricultural community. Worldwide and nationwide markets are made possible only by regular and cheap transportation "So the farmer may conclude that when he co-operates with the railroads, his most potent allies, he is doing good for himself and much good for his

The farmers and railways shall flourish forever."

# Slaves of the Sea

CLAY CHAMBERLAIN

(Copyright, The Frank A. Munsey Co.)

Within the battered, sweltering conning-tower of B-23, Lieutenant Barton and his ensign, Rolf, marshaled the vulsing in an affort to regain his selfutmost of their nautical skill against the onslaught of the elements, while brawn to keep the rolling, pitching

boat head-on to the seas. All that day, from the great heart of the desert, the sirocco had pulsed feverishly across the Mediterranean.

No word had passed between the stocky, swart-visaged commander and his lithe-bodied, blond-haired aid since the periscope-staff had snapped by the board in the first crunch of the ravening wind Then Rolf had roared above the pounding of the combers against the thick-glassed ports.

"She'll never stand the kick of this sea. We'd better sink her now or we'll have to swim

"Orders," Barton had snapped in reply "'To the Dardanelles! Report to the captain of the Victory by the 15th. Noon!' That's tomorrow; and we're going through if the Gnomes don't crack.'

So they had struggled on grimlymuscles writhing under the strain and knuckles outstanding from knotted fists hard as the spokes which they gripped.

At the same time, behind them, Frank Marsh, an aged boatswain, swung the lever that played the searchlight, unceasingly to and froand while he toiled, he sweated-and prayed. Down below, behind a stepped, steel door, the engineer, Jack Corrigan, straightened up from the stinking cylinders, and as he mopped his fat, red face-he swore.

These four men made up the roster of this latest acquisition to the British Mediterranean fleet. B-23 was a new type of submarine, built for a special

Should the need arise, her duty was to fathom out the location of planted explosives in the deep murk of harborbottoms and then to render their controlling wires useless through the action of the sulphuric acid which she carried and which could be discharged . hot from the huge platinum syringe built into her bow.

Seemingly opportunity had come with the departure of the Balkan agents from the futile London conference For it was at the very moment when the allied armies began to tear down the web of diplomacy spun across the Turks' musty corner of Euthe mest of the flotilla at Gibraltar and hurried away on her secret mission. No one aboard yet knew the pur-

pose of the trip. Barton's instructions-direct from the admiraley-were merely to reach the superdreadnaught Victory, at the Mediterranean end of the Dardanelles not later than the hour mentioned and to have his arrival wirelessed at once to London. He had further to deliver a packet-then locked in his strong box below-the official red seal of which still remained unbroken.

Though Barton was bent upon carrying out these instructions, the elements were not.

It was after B-23 had passed Cape Mataplan and, plowing desperately against the overwhelming forces, had worked well into the tanglements of the archipelago, that her flood-gate suddenly gave way.

With a series of thundering glubs, like the filling of some giant bottle, the water surged into the jacket. reach the planing lever of the horizontal rudder or throw the control of take the first turn." the balance-weight, the submarine dug plunging beneath the surface like a frightened narwhal.

Frantically, Rolf jerked at the dangling bell-cord, while Barton leaped in the priceless cylinder of air, Barton | cords showed ivory-white beneath toward the ladder from the hatch to the room below. The drive of the engines ceased when the boat's propellers sliced into the air, but her own momentum thrust her onward. And when gravity clutched at the logging of their weakness and their strength. head, she dove in a short, swift arc, coming, an instant later, to a grinding scraping stop which shook Barton from the rungs of the ladder and sent Rolf reeling against the lookout-port.

Barton leaped to his feet, and before rushing to inspect the damaged tank wrenched open the door of the engine-room.

"For God's sake!" he shouted to Corrigan, "quick! Get that gate shut and the pumps going! And the weight as far aft as it will go! Flood that rear trimming-tank, too! Tilt her up, somehow!

Loosened by the hammering seas, the automatic bolts had allowed the gate to slip.

Corrigan switched on the engines and closed it again in a momentwhere he held it by wedging the gears. But a single glance told Barton that the rent forward could not be repaired under water. As he hurried back, he caught sight of the balance-weight rumbling toward the stern. Like the with its heavy load was used to alter the boat's keel-angle.

"What's that you've got there for weight?" he called to the engineer, as

rigan, "two hundhred av thim cum chance of escape remains. aboard the day av our startin', wid no room fer stowin'. So I chucked the oirun in the say. They're hivier, anyway; an' 'tis a foine savin' av space."

watched at the gauge until it showed that the jacket had been re-emptied. Still the boat did not rise or level it-

"Better give her the reverse!" the Heutenant ordered. "Easy at first! We must have rammed the mud pretty deep to stick like this."

As the big gas engines increased the speed of their exploding rataplan, Rolf followed by the boatswain, whose thin, twitching features matched the chalk-

like color of his hair.

"We've poked half our length through her rotten side. The arc won't throw over twenty feet down here, and I just made her out on the fringe of the

At his words all looked toward the spinning shaft. And when the submarine failed to yield—though the pull of the screw shook every bolt in her frame, the realization of the fearful possibilities of their situation, in turn, eft each man shaking.

"Caught - God - my wife, poor Mary!" fell piteously from the boat-Barton flashed him a look from his deep, black eyes, as if searching the

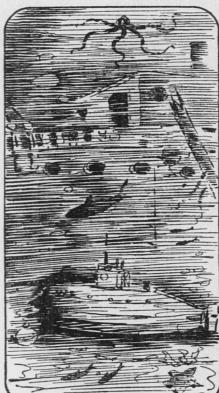

old man's soul, and as he clicked an order, his jaws set square. "Go get me the reading for depth!" he said; and Marsh walked away, con-

control. Corrigan stooped to close the oilthey strove at the wheel with united | feed-absently; for in his mind was limned the picture of the girl on the banks of Shannon for whom he had lived since the mother died-his daughter, Aileen, blue-eyed as he, but with gold alloying his coppery nair

and health-glow toned to beauty. He roused from his introspection only at the falling of a dislodged wrench which struck the floor with a deep-toned clang that went tolling in ominous echo from wall to wall of the steel-lined room. Somewhat startled at finding himself alone when he looked up, he turned and followed Barton and Rolf into the outer chamber. Here the boatswain met

"What is it?" asked the lieutenant. "Sixty-seven feet, sir," Marsh reported-his voice barely audible.

Before morning several further attempts were made to dislodge the submarine, but an anchor fluke had hooked into the wreckage and driven through the chain-hole so firmly that the trials were fruitless-and worse. For the pent-up exhaust from the engines soon made that compartment insufferable, and each time the air-tight

"Poked Half Our Length Through the Rotten Side."

door was opened a noxious, stifling odor swept into the outer room. "It's no use," said Barton at last, 'shut them off, Corrigan! They're

hours of life now!" All the lights on the direct circuit went out when the motors stopped, leaving the interior shrouded in gloom save for one small battery-incandescent which shed its feeble, saffron illumination over a table in the center of the living room.

only eating up air-and that means

Sleep was unconsidered; it was not to be thought of there, and could come to the men only when exhaustion dragged them down.

"It's getting bad in here already," Simultaneously a head-seam opened, said Barton, as he noted the rapidity swamping the forward trimming-tank, of their inhalations "I'm afraid we'll and before either helmsman could have to start the air. Stand two-hour watches while it lasts. Corrigan, you

As the engineer made his way slowher snout into the waves and went | ly toward the corner where the little brass controller of the air-valve protruded from the wall beside the clockfaced gauge that recorded the pressure straightened his sagging shoulders

resolutely, and raising his gaze to the eye-level of the other men, searched them keenly, without faltering, as if to sum in swift appraisal the measure "It would be useless for me to make light of the conditions confronting

us," he said at length His voice was pitched low, devoid of inflection, and so complete was his self-restraint, lacking even in the slightest betrayal of sympathy or emotion. It was more like the perfunctory droning of some jurist repeating the ritual of a mandatory sentence; yet none the less clearly it carried to the limits of the chamber.

"Our very closeness to our destina tion means a scarcity of merchantmen in these waters. And we are much too far down, anyway, to be seen from the surface, even if the periscope was not gone. The only possible manner can conceive in which to attract attention is to keep the propellers going. But a sea making as it did last night won't calm itself in a day; so the commotion we might kick up wouldn't have much chance.

"Remotely, we might work loose. trimming-tanks, the long, metal trough it's here, with life. Every five minutes It's almost a hopeless possibility; but those engines work shortens that life an hour. For one, I am loath to surrender a second. We've failed in our the coffinlike box crawled up its slant but I'm going to find that packet, and mission. What it was I don't know; "Bath'ery plates," answered Cornot be too late to serve so long as a if it's in there I'll find out. It might

"I can't assure you of myself that there is the millionth part of a single opportunity for us to win back our freedom; but for the sake of the ones He turned his attention again to the we care for, I want to cling to that big, sloshing triple-pump, and Barton fraction. If anyone feels differently,

speak out!" There was no audible response, al though the boatswain's lips moved silently, as they had continued to do since the reference to his wife. Pos-

sibly he was praying again. Barton stood waiting a moment; then, nodding appreciation of the wordless assent, he sat down at the table. From beneath it he drew forth came tumbling down from the tower the flat, metal box. There was no the flat, metal box. There was no great, whistling gulps. In their pursound in the room while he turned pled, swollen veins and their jaundiced through the papers noiselessly, save eyes and yellow skin, the effect of at several-minute intervals the release "There's a hulk sunk dead ahead." of the air-valve which hissed sharply too apparent.

inability to reach the men within. The lieutenant presently found the packet, and for a matter of seconds his eyes countered the forbidding

stare of the lurid seal. Then he split the wrapper lengthwise, and as he bent over the closely contents, Rolf instinctively nearer. Suddenly Barton's arms began to tremble upon their resting elbows; his hands gripped at the paper spasmodically, and it fell in a crumpled heap when the lieutenant pushed backward, staggering to his feet gaspingly, as if the air already had failed.

Rolf snatched up the sheet, smoothcrowded behind him while he read, away from his post. Shorn of saluscription, the message ran as follows: "Certain interests at Constantinople

demand protection, and it is imperareach that port. They will be ordered through Marmora on the 30th. The Dardanelles are known to be heavily mined. Secret advices from the intelligence bureau are that mines will be fired under pretense of accident if attempt is made to pass. Inadvisable at present to recognize this information officially. B-23 will act under your orders. Instruct Lieutenant Barton to explore immediate waters carefully, charting a course through the strait which will avoid all difficulties.'

He concluded the missive aloud, half hysterically, and looked at the For an appreciable interval no one

"May the saints save thim whin they're going through," murmured Corrigan at length, and awaking to his from the spell by a prolonged twist of the valve-lever.

It was nearing the close of the first benighted day of confinement when Rolf succeeded in relighting the electric beacon in the forepeak of the conning-tower by wiring up several storage batteries in series. The feeble current did not produce a light of very great penetration, but the ensign, nevertheless, climbed aloft to the little circular room in the hope that it might help him to discover just

why the submarine would not move. As he peered through the forward port, the glance of the ensign fell unexpectedly upon a cylindrical object barely piercing the lighted area below on the starboard side. Pausing only to confirm his impres-

sion, he descended the ladder in haste. Marsh and Corrigan, where they sat, had sunk to their first troubled slumber. Barton stood at the air-valve. Exchanging places with the lieutenant, Rolf motioned him above. And

added solemnity of visage did not need his corroborating words: "It's a mine, unquestionably but not a contact affair, for I made out wires coiled around the top," he said. "They've dropped them pretty far out, or we made more westing than I thought. There's nothing can be done about it, though, from our position;

mentioning it." The four men were awake together as the second day came to an end. Marsh huddled in a chair beside the table, feverishly scratching at a pad with the stub of a pencil. Already his skin, stretched tightly over his protruding cheek-bones, held something of the dulling gloss of timestained parchment. As he wrote, he kept speaking his own dictation in a half-audible whisper.

"Better save your strength," Barton cautioned, after observing him silently for some moments Marsh slumped in his chair, his sparse arms tight at his sides, touch-

ing the floor with his finger tips which still outstretched rigidly as when they had dropped the pad and pencil at Barton's implied command. The lieutenant, at the table, tapped with a paper-knife; then laid it aside with an of providential.

annoyed look of self-reproof. Rolf sat on the edge of a bunkhis normally full lips drawn to a grayblue line, his starting eyes fixed in a stare that seemed plumbing infinity.

Corrigan was at the valve. He stood with back to the others, his head so far bowed forward upon his breast that the rolls of fat at the nape of his neck pressed flat, and the the skin. Now and again his body heaved and a ponderous sigh welled from within to blend sonorously with the seethe of the liberated air. Presently he began to hum softly

under his breath: "There's a sunny spot in Ireland-" "This is awful," he said, "awful! My God, isn't there anything we can do? Can't we send up a bottle-or

something? "Nothing." Barton replied with apparent effort. "The torpedoes!" Marsh leaped to

his feet, his face fairly contorting in his excitement. "They'll tear up the surface when they explode," he wailed. Barton glanced at Rolf. Neither

had spoken of that other instrument of destruction outside almost brushing the hull. The ensign still looked away. He could not speak to dash the old man's hopes. "I'm afraid it wouldn't do," the

lieutenant shook his head reluctantly. "The hulk is close aboard, and that's where they'd go off. We might chance them splitting her in pieces before they did us, if she were all. I'd thought of it. But we lay within five feet of a mine-plant. The concussion-no, we can't do that."

As those in the last death-watch. tolling off with quickened heart-beats the seconds before the black-capped march to eternity, the men passed the next afternoon. There was a brief relief from

ension, while they ate from the plentiful store in the food-locker, and occasionally one or another stepped to the big water-tank to drink. Otherwise attention centered on the passage of time.

The hands of the ship's clock moved forward, and as remorselessly, the hand on the dial toiled in the other direction-pointing nearer and nearer. like the index finger of Fate, to the little zero that meant annihilation. From moment to moment, the hissing of the valve became almost sensibly fainter.

Their days of living in the small, unventilated compartment had so fouled the atmosphere that the men breathed pantingly, open-mouthed, in

Barton sat at the table—the log His own message had been writtena farewell to life and to her for whom he most cherished it. When at length swung at anchor barely a thousand he raised his eyes from the page, they yards away he might have altered his wavered ever so slightly as he ad-

dressed the old boatswain. "What shall I say, Marsh?" The words came palpitatingly as he struggled for breath. "I'd better have it now-in time."

The boatswain was at the valve controlling the lever with fingers agitated as the indicator itself. His throat muscles gripped spasmodically at the question, and he seemed about to fall. When he turned, his eyes ing it upon the table top. Marsh held a look of longing so unutterable, yet withal so hopeless, that Rolf and Corrigan stretched at arm-length and Corrigan with common impulse glanced away, and Barton clenched his tation, impertinent detail, and sub- fist until the penholder snapped in

"Tell Mary," Marsh lingered falteringly over the name, "say I didn't tive that the Victory and Dauntless think the old cottage at home was good enough for her; so I'm going to get a better one promised us yonder. Tell her I'll keep it waiting, as she did for me, and that I'll try not to mind her not coming for a while." The old man's voice failed, and he pressed his face against the wall to

> hide his feelings. The broken holder shook in the writing and paused a long moment at the end, while Barton summoned the reserve of his stoic will to help him at his task. Ere the lieutenant looked toward him, Corrigan's full-fleshed face had sagged lumpily, till his eyes seemed drawn and misshapen. Rolf's eyes, as he swayed on the edge of a bunk, again held that uncanny impres-

sion of illimitability. With his underiaw driven forward so that the teeth clasped his upper lip and deep hollows showed before his neglected duty, he roused the others, ears, he seemed lost in the mazes of some intricate problem. As Corrigan started to speak the ensign suddenly rose to his feet.

> "We sha'n't die!" he interrupted in a whisper which literally snarled through the room. Then his voice climbed in a raucous crescendo to the volume of a shriek, "We sha'n't die!" He stood like some young Roman orator spellbound by the eloquence

of his own thought. "Great God, I have it!" He spoke with the awesome deliberation of a seer from the depths of his trance. "We can make air." And at the words he crumpled limply to the floor. Barton was by his side instantly,

shaking him roughly, savagely, while he fought back a hope that he dared "What do you mean, Dick? Come -speak! Make air? Man, are you mad?" he cried as he tugged at the

prostrate form with all his failing "Yes! Air - oxygen - life!" the when the later presently returned, his ensign muttered. He sat up unsteadily. "At the academy-remember? The acid and the batteries! We decomposed water. There's enough in the tank till we raise the pressure-

then we'll get oceans of it." He swung his arms above his head -dramatically-a bit wildly, while Barton himself almost collapsed as hi so you'd better turn to and try for a mind flew back to his training-school bit of sleep. Don't fret the others by chemistry and the experiment of long before.

Electrolysis-thrusting the ends of two current-charged wires into water, salt or fresh, tinctured weakly with sulphuric acid, beyond question, would separate the liquid into the oxygen and hydrogen of which it is composed. One part of the first to two of the a single cubic foot of the water would produce 2,000 feet of the gas. For an instant thought of the fatal

effect of pure oxygen struck the lieutenant cold. To make it respirable in the air it is drogen is also inert and harmless to breathe and its ratio would be sufficiently large. Corrigan's act in substituting lead-oxid battery plates for the iron weights of the balance-trough now appealed to him as nothing short

"Unbelievable!" he cried as he began to gather together all the glass Leyden-jars they had; "yet-thank God-so true-so true!'

Their reprieve was barely in time: and the lieutenant and Rolf went at the preparations feverishly, while Marsh and Corrigan watched dumbly. scarcely comprehending the vital to ship water dangerously. Already sweep of events.

And when at last the first tiny bubbles began to rise through the water like the effervescence of some Jovian wine, no Ponce de Leon arrived at his matched the wild cry which sprang from the lips of Barton and Rolf. For to them it was life, spelled in 65-foot letters that reached to the top of the

A box of caustic soda used for corroding parts, was found; and its contents scattered about the room served to absorb much of the carbonic gas. As the pressure rose a further means of disposal was recalled by Rolf. The balance-trough was filled with water, and it gradually became charged with the gas. At the end of a week the barograph showed that it would be safe to open a port to get in touch with the world above.

When no bottles were found in the medicine chest of a size to be reasonably seen on the waves, and when the other men failed to make any of the empty food-cans floating tight, it was Corrigan who hit upon the expedient of using the oiled-silk cases in which the torpedoes were wrapped.

They spread out the folds of these with their breath and securely tied the ends. Barton put down their position as he had figured it, noting the possibility of error in longitude, and making mention of the hulk-the location of which he thought would probably be known.

The several slips of paper were placed in the bags, of which there were four; and three of them were released at brief intervals.

The men were now in total darkness. The single light inside had really been extinguished to conserve the battery-power. Their fourteenth day of imprison ment came; and still the men had re-

ceived no intimation of any effort to Once more-aboard the battleship cue them. They could not know that the frail silk bags had burst at the surface and had sunk again, carrying their messages with them. But such a possibility occurred to Rolf when the last of the casings was about to It was then that Corrigan volun-

teered to go up in its place. But he encountered another shock when Barton explained that for all practical purposes they were shut it gerous "bends" which must attend a lance.

outspread before him—painfully, yet when the batteries would fail, and as painstakingly, inscribing the record. a final resort, was it his purpose to have them all risk the trip together. Had he known that the Victory Richmond.

> Hope for B-23 had long been abandoned, and already the nation had formally honored her "dead"-when the fourth bag left the little tower. At Rolf's suggestion all the gas had been forced from it except just enough to

carry it up. Regardless of the lost mine-scou the dreadnaughts had been ordered to rim the strait. They were to start the trip which held so much rumored hazard the next day, and had sent their hydroplanes aloft in the vain hope that human vision from their height, like birds, could find the hidden mines.

So when the pilot of the machin from the Victory saw an oviform yellow object pop from the blue sea beneath him, as a pit might be squeezed from a plum, it was not strange that he betrayed his astonishment by alallowing the hydroplane to side slip OVER LANE'S JEWELRY STORE dangerously.

It is enough that it jumped light y away from the water and came sailing jauntily toward the aviator just as he recovered the machine's equilibrium and his own presence of mind. Puncturing the bag quickly with a pistol shot, he volplaned quickly to the water. And thereafter recovering the floating silk and reading the paper -he remained, hovering over the spot, as closely as he could judge, whence the small balloon had sent a launch to his assistance. And within another hour the powerboat was again putting out from the battleship with diving

equipment and a man to go below Marsh was on duty in the conningtower, where for days the men had set a watch, when there came a faint, yet persistent click.

He had dozed momentarily; and at first it seemed part of his dream He had returned to his rose-bowered cottage and stood gently knocking at its door, so that Mary should not be too greatly shocked with surprise. But

The Lieutenant Presently Found the Packet.

the reiteration of the sound aroused latter would be the proportion; and him; and he turned to meet the nodding Cyclopean eve of the diving helmet peering in at him through the port.

He shouted to Barton, and they soon had the man inside. It was decided that all could use diluted with three times its volume of the apparatus, if a rope were attached nitrogen. Then he reflected that hy- to the leaded feet to drag it down after each trip. Marsh was the first to go up, the diver remaining to show the others how to adjust the suit When the helmet was removed from the boatswain in the boat above one of its crew fainted at sight of the seeming death apparition incased in the rai-

> ment of the man they had sent be-The diver himself followed; then

Corrigan. For the passage of the lines the big port had to be kept open continuously; and as each man left air also lurched out until the submarine began it gurgled deeply in the hold-with great spheres of gas surging upward life a fountain. And at this momentunthought of before by minds almost hysterically excited—it came to Rolf quested Fountain of Youth could have and Barton as they faced each other in the tower that only one of them could use the suit. For it was impossible to secure it in place without

another person's help. True to the tradition of the service, Barton stepped aside. But youth, L. & N. Time Table which before had cried aloud for life. now, in the supremacy of its courage,

rose indifferently to it. "You've no right to decide it all vote for her. You first!" Barton yielded; and the ensign closed him into the cumbersome apparel. The top of the ladder was already awash as Rolf gave the helmet a final twist. He pushed the lieuten-

ing his lungs from the exhausted air kicked after him. On the bridge of the battleship the commander watched through powerful No. 27-Richmond to Louisville via, Ro glasses: and as man after man rolled over the gunwale into the launch the gray-whiskered old sea-dog grumbled a hard-learned text from his Sunday-

school boyhood: "And the sea gave up the dead which were in it; and they were judged every man according to his works."

"By God! I'd make 'em all admirals -if I had the judgin'!" he said; and the reward of his generous impulse came next day when the mine-firing rumor proved to be false. The first word that flew from the

aerials of the Victory held the whole earth a moment gasping; but the first word that fell from the lips of the rescued men was-to each-a beloved name. All except the ensign, who was dragged into the launch insensible to

-he faced death and refought the fight. And when, at last, his heart throbbed through to triumph, it had gained what such a heart deserved to hold. For of all the queenly company which was visioned in his delirium only one came back with him to the realm of consciousness; and in that our when he opened his eyes he, too, whispered a woman's beloved name!

#### Many Cures Reported Daily In Towns Where It Is Known.

The wonderful cures that are being made by this remarkable new remedy are almost beyond belief.

A young lady from Ottumwa, Iowa, for many years suffered from a bad case of eczema, Her face was a sight to behold; all covered with red blotches, pusand stands before the world in the tules and pimples. So unsightly was twentieth century as the most solid, her appearance she gave up all social substantial and reliable class of people life. Failing to find reliaf with doctors and discouraged. After a few weeks' the British government which does it treatment Amolox liquid and ointment, credit. To provide against the deplethe scaly redness disappeared, pustules healed and she was entirely cured. A few months following her mother wrote the duty of the government than to pro

that Amolox had done wonders for her vide against the emergencies of the condaughter, and she was married last week.

This is only one of the many cases that are being reported in towns where Amolox has been introduced and its merits have become known. Amolox Ointment will quickly banish pimples, blackheads and all minor skin trouble. Bad cases of Eczema, Psoriasis. Tetter and skin L. Perry, the druggist.

Speed Lust Claims Scores. Again the auto driver with a lust for speed has established a record for

nonth in the United States. In July, just ended, 250 persons were killed in automobile accidents. Of this number 35 were run down by cars moving at a high rate of speed. The re naining victims were crushed under machines or were hurled to death when collisions occured.

New York State leads with 72 dead. Nearly half the Empire State victims met death either in New York City or in its immediate vicinity. Pennsylvania is second with fifty four

Illinois is third with forty-two.

Massachusetts is fourth with eighteen California was the scene of fourteen Ohio is next with twelve, and the list may be increased, as several injured

ersons are reported to be dying.

Missouri reports 11 deaths. Tennessee witnessed six fatal crashes. In practically every State there were it least two fatalities.

Record Breaking Honey Crop Virgil Weaver, the expert bee man, who resides two miles north of Falmouth, Ky., will harvest 35,000 pounds of honey this summer. The crop is perhaps the best in the history of the country. This is the largest single crop of honey ever produced in the State, and Mr. Weaver is very proud of the fact that he has broken all records in honey production in Kentucky. The honey season is now about over until the fall blossoms come in on in September.

Other honey producers in Pendleton county are quoted as saying that their honey product this year will be in ex fell into a puddle. He looks so funny.' cess of 10,000 to 15,000 pounds each .-Georgetown Times.

United States would fill thirty nine train loads, forty cars to the train, forty tons to the car. The honey crop yearly sent to market is valued at twenty million dollars. The great quantity of pollen and shrubs and plants are coined into honey-into money-without a penny of cost to anybody. Nature without price up the street." supplies the materials out of which the honey is made and the bees turn the cause he was lonely and forlorn. On isn't Billy! It was a man named material into the finished product. Man the wide window-seat it was brighter, Smith, and he lives in St. Louis, and I supplies the bees with hives in order and one could see a telegraph boy a found out by telephoning the Tribune. that he may rob them of part of their block away if one came. Then, too, And it isn't Billy, it isn't Billy! I was can be helped by man, the bottom fact remains that nature and the bees do all the work and in one particular at least, something can be procured for nothing

#### CROPS OF MADISON

nost productive and prosperous counties in the State, has the greatest crop prospect at the present time she has you think it's Billy, do you?" witnessed in years. Wheat was good. although the crop was not as bountiful ing and threshing greatly damaged the tell mother, how could she? in yet the yield was a good average. the hay crop was cut short, but the brother asked. quality is good and the average fair coming here, is he?" ion bushels of wheat will be harvested Never in the history of the county was there a finer prospect for a bumper corn ernment figures, breaking all previous crop than at present This will more than offset any shortage that may exist in the hay and wheat crops. The acreage of tobacco planted this season does not seem to be quite as large as former years, and in some sections the quality a finer crop of oats than this year. The is not the best, owing to the incessant crop will average 40 bushels to the acre, rains during the month of July. But tobacco is a peculiar product and if the Last week the C. T. Ashley Company | weather is favorable during the coming bought and shipped 4,000 bushels of fall months, no doubt, tobacco in this wheat from Nicholasville, for which county will come up to the standard. mother, it isn't Billy!"

Sold by H. L. Perry, Richmond, Ky

DURBON REMEDY CO., LEXINGTON, KY.

(Copyright, The Frank A. Munsey Co.) Mary sat by the front window, crouched down, watching. Her eyes were red with recent tears, but she spoke bravely and without a tremor to meone in the other room.

"There are some boys out here playing tag," she said with a poor imitation of a laugh. "One of them just "When Billy went to West Point he said there wouldn't be anybody to The annual output of honey in the fight," the littlest brother submitted shakily. "'Less it was Indians. Now they send him to war."

Mary drew a quick breath. Their mother was sewing in the library while Lionel read aloud to her, and nectar which the bees gather from trees think they weren't being brave, too. she must not hear. She must not "Come here, Bobbie," Mary said citedly burst in. softly. "From here you can see 'way

The littlest brother came gladly, be which they all felt. "It isn't Billy, it silent it frightened a body. Ever since it might have been. I knew there the newspaper had said, yesterday, that an officer, a lieutenant of the Forty-second, had been killed away off there, mother had not slept, and she was so white- It seemed there were not many lieutenants in C company of the Forty-second, and somebody Madison county, which is one of the named Censor had held back the name. "Will the president telegraph, Mary?" he asked in a whisper. "Do

Mary was gazing wild-eyed at a boy father did was to pat her on the back in blue who came whistling down the and say: "There, dear, there!" while street. What should she do if he two great tears rolled down his own as it had been during bumper crop came to their steps? Could she get cheeks unheeded. years, and wet weather during harvest- there before he rang? How could she

"If it is Billy, will they put flowers Owing to the drought the past spring on his grave, Mary?" the littlest down on the other side, as near as she "Mary, is that boy could, her face turned away from him.

"No," Mary said with a little gasp. "He's gone to Mrs. Winthrop's. I suppose their aunt is coming to visit. Go open the door for the postman, there's a good boy. The postman is coming. mother," she called. "Bobbie is getting the mail."

Thus would mother be saved the fear that a message had come. Lionel closed the book, and she could hear him speaking with a brave jocularity. "Well, we'd have heard by this time,

anyhow. I said all along there wasn't anything to worry about. It isn't as if he were all alone. He's got a lot of friends in the regiment, you know, and somebody'd wire. They'd have plenty of time, because they never do much the day after a fight."

Bobbie brought in the mail, all cast aside for the picture postals from Billy which they admired while mother read his fat letter in silence. It was the custom to read Billy's letters aloud, but no one wanted the task now. Each could read by himself, except the littlest brother, and Mary read it to him in a whisper on the window-seat. Deet down in their hearts they knew they might have worse than this to bear, with Billy's cheery letters coming every little while, even though Billy himself were lying silent in another land, under the flag of the alien, the

enemy. How could they bear it then? The telephone rang insistently, harshly, and Lionel, who was not worried, sprang with one leap to answer it, his one awful thought being that they did telephone the telegrams sometimes. The color came back to his face as he listened.

"It's father," he said at once. "he says," Lionel added after a moment, "he says that headquarters has had no news, and he thinks that is encouraging. They would have heard, he thinks. He is coming home early."

Father could not do any business, then? What mattered it whether there was any business done any more; what mattered anything? Mary, on the window-seat, her arm over Bobbie's shoulder, could see, hundreds of miles away, the little group of men fighting desperately against the advancing hordes and one by one falling where they had stood, guarding the stores. A lieutenant was very young, just out of the Point, gay, debonair, affectionate, home-loving boy that he

So the time dragged along and fasands of years ago and Eve's daughther came home. He talked about ters have followed it ever since. Hawaii is a queer place. Everything socially is what I may call topsyturvy. Not but what things are correct. They are almost too much so. But still things are sort of upside down. The most ultraexclusive set there is the "Missionary Crowd." It comes with rather a shock to learn that in Hawaii the obscure, marytrdom-seeking missionary sits at the head of the table of the moneyed aristocracy. But it is true. The humble New Englanders who came out in the third decade of the nineteenth century, came for the lofty purpose of teaching the Kanakas the true religion, the worship of the only one genuine and undeniable God. So well did they succeed in this, and also in civilizing the Kanaka, that by the second or third generation he was practically extinct. This being the fruit of the seed of the Gospel, the fruit of the seed of the missionaries (the sons of the grandsons) was the possession of the islands themselves, of the land, the ports, the town sites, and the sugar plantations. The missionary who

He was a sugar body turning around the fingers and king, a coffee planter, a rubber pi- the legs digging into the skin and laughed.

"It Bit Him Twice-I Saw It."

moter of three out of every four new enterprises launched in the islands. He was a society man, a clubman, a yachtsman, a bachelor and withal as handsome a man as was ever doted upon by mammas with marriageable daughters. Incidentally, he had finished his education at Yale, and his head was crammed fuller with vital statistics and scholarly information concerning Hawaii Nei than any other islander I ever encountered. He

turned off an immense amount of work, and he sang and danced and put flowers in his hair as immensely as any of the idlers

He had grit, and had fought two duels-both political-when he was no more than a raw youth essaying his to do but have a good time. Food, first adventures in politics. In fact, shelter, clothes, medical attendance, he played a most creditable and cour-ageous part in the last revolution, when the native dynasty was overthrown; and he could not have been over sixteen at the time. I am pointing out that he was no coward in order that you may appreciate what happens later on. I've seen him in the breaking yard at the Haleakala ranch, conquering a four-year-old brute shat for two years had defled the pick of Von Tempsky's cowboys. And I must tell of one other thing. It was down in Kona-or up, rather, for the Kona people scorn to live at less than a thousand feet elevation. We were on the lanai of Doctor Goodhue's bungalow. I was talking with Dottie Fairchild when it happened. A big centipede-it was seven inches, for we

It Was the Funeral Procession.

mained to gobble up the whole heath- My mind refused to work. There, But that is not the Hawaiian queer- within two feet of me, the ugly ven-"What is it?" she asked, starting to

queer thing. The old missionaries and My exclamation attracted Kersdale's old traders were mortal enemies. You attention. He glanced our way caresee, their interests conflicted. But lessly, but in that glance took in evtheir children made it up by inter- erything. He came over to us, but "Please don't move, Dottie," he said

> He never hesitated, nor did he hurry and make a bungle of it.

"Allow me," he said. And with one hand he caught her scarf and drew it tightly around her there. The native women are sun- shoulders so that the centipede could ripe Junos, the native men bronzed not fall inside her bodice. With the Apollos. They sing, and dance, and other hand-the right-he reached all are flower bejeweled and flower into her hair, caught the repulsive crowned. And, outside the rigid "Mis- abomination as near as he was able sionary Crown," the white men yield by the nape of the neck, and held it to the climate and the sun, and no tightly between thumb and forefinger matter how busy they may be, are as he drew it from her hair. It was prone to dance and sing and wear as horrible and heroic a sight as man it to the bacteriological test. A man

oneer, a cattle rancher, and a pro- scratching as the beast endeavored to free itself. It bit him twice-I saw it-though he assured the ladies that he was not harmed, as he dropped it upon the walk and stamped it into the gravel. But I saw him in the surgery five minutes afterward, with Doctor Goodhue scarifying the wounds and injecting permaganate of potash. The next morning Kersdale's arm was as big as a barrel, and it was three weeks before the swelling went down.

All of which has nothing to do with my story, but which I could not avoid giving in order to show that Jack Kersdale was anything but a coward. I have ever seen. He never turned a hair. The smile never left his lips. And he dived with thumb and forefinger into Dottie Fairchild's hair as was destined to see stricken with fear

a thousand times more hideous even than the fear that was mine when I saw the writhing abomination in Dottie Fairchild's hair, dangling over her eyes and the trap of her bodice. I was interested in leprosy, and upon that, as upon every other island object, Kersdale had encyclopedic knowledge. In fact, leprosy was one of his hobbies. He was an ardent defender of the settlement at Molokai, where all the island lepers were segregated. There was much talk and feeling among the natives, fanned by the demagogues, concerning the cruelties of Molokai, where men and wom-

died. There were no reprieves, no commutations of sentences. "Abandon hope" was written over the portal of Molokai. "I'll tell you they are happy there," Kersdale insisted. "And they are infinitely better off than their friends and relatives who have nothing the matter with them. The horrors of Molokai are all poppycock. I can take however, showed the sign. On my reyou through any hospital or any slum in any of the great cities of the world.

The down to Molokai and applied it, and the last stages and then wrote pathetic letters to the board of health, protesting against his expulsion on the ground that no one was so well able as he to take care of his poor wife."

"What is this infallible test?" I de-

"The bacteriological test. There is discoverer. As for the test, it is very and well beloved of mensimple. They have succeeded in isolating the bacillus leprae and study ing it. They know it now when they see it. All they do is to snip a bit of skin from the suspect and subject "Then you or I, for all we know," I

Kersdale shrugged his shoulders

for it to incubate. If you have any doubts go and see Doctor Hervey. He'll just snip out a piece of your kin and let you know in a jiffy."

One afternoon, writing letters at the club, Jack Kersdale dropped in on me. "Just the man I want to see," was gayly as if it had been a box of salted his greeting. "I'll show you the saddest almonds. Yet that was the man I aspect of the whole situation-the lepers waiting as they depart for Molokai. The Noeau will be taking them on board in a few minutes. , But let me warn you not to let your feelings be harrowed. Real as their grief is, they'd wail a whole sight harder a year hence if the board of health tried to take them from Molokai. We've just time for a whisky and soda. I've a carriage outside. It won't take up five minutes to get down to the wharf."

To the wharf we drove. Some forty sad wretches, amid their mats, blankets and luggage of various sorts, were squatting on the stringer piece. The Noeau had just arrived, and was making fast to a lighter that lay between her and the wharf. A Mr. McVeigh. the superintendent of the settlement. was overseeing the embarkation, and to him I was introduced, also to Doctor Georges, one of the board of health physicians whom I had already met at Kalihi. The lepers were a woebegone lot. But here and there I noticed fairly good-looking persons, with no apparent signs of the fell disease upon them. One, I noticed, a little white girl, not more than twelve, with blue eyes and golden hair. One cheek. marking upon the sadness of her alien situation among the brown-skinned

afflicted ones, Doctor Georges replied: "Oh, I don't know. It's a happy day in her life. She comes from Kauai. Her father is a brute. And now that she has developed the disease, she is going to join her mother at the settle-Her mother was sent down there three years ago-a very bad

funny thing is that when the test was discovered they immediately went they found a number who were not lepers. These were immediately deported. Happy to get away? They wailed harder at leaving the settlement than when they left Honolulu to go to it. Some refused to leave, and really had to be forced out. One of them even married a leper woman in

manded.

"Who can say? It takes seven years

Later on he introduced me to Doctor Hervey, who loaded me down with board of health reports and pamphlets on the subject, and took me out to Kalihi, the Honolulu receiving station. where suspects were examined and confirmed lepers were held for deportation to Molokai. These deportations occurred about once a month, when, the last good-bys said, the lepers were marched on board the lit-It was the cleanest exhibition of grit tle steamer, the Noeau, and carried down to the settlement.

"You can't always tell from appearances." Mr. McVeigh explained "That man there, that big chap, who looks the pink of condition with nothing the matter with him, I happen to know, has a mark on his foot and another on his shoulder blade. Then there are others—there, see that girl's hand, the one who is smoking the cigarette. See her twisted fingers. That's the anesthetic form. It attacks the nerves. You could cut her fingers off with a dull knife, or rub them off on a his school chums, Alfred Staarter, nutmeg grater and she would not exhad contracted it, gone to Molokai, and | perience the slightest sensation." "Yes, but that fine-looking woman,

was beautiful by our standards, as well-one of those rare blossoms that she, of all women, was doomed to Molokai. She walked like a queen, across the lighter, straight on board, and aft on the open deck where the lepers huddled by the rail, wailing, now, to

her race.

"You say 'was,' " I interrupted. "And I mean it. She is finished." He shrugged his shoulders pityingly. "A dozen haoles-I beg your pardon, white men-have lost their hearts to her at one time or another. And I'm not counting in the ruck. The dozen was clear away and the faces lining I refer to were haoles of position and

"She could have married the son of the chief justice if she'd wanted to. You think she's beautiful, eh? But you should hear her sing. Finest native woman singer in Hawaii Nei. Her throat is pure silver and melted sunshine. We adored her. She toured America first with the Royal Hawaiian band. After that she made two more trips on her own account-concert work."

"Oh!" I gried. "I remember now. I heard her two years ago at the Boston Symphony. So that is she. I rec-

ognize her now." I was oppressed by a heavy sadness. Life was a futile thing at best. A short two years and this magnificent creature at the summit of her magnificent success was one of the leper squad awaiting deportation to Molokai.

I recoiled from my own future. If this awful fate fell to Lucy Mokunui what might not my lot be-or anybody's lot? I was thoroughly aware that in life we are in the midst of no getting away from it. Dr. Hervey death-but to be in the midst of a -he's our expert, you know-was the living death, to die and not be dead, first man to apply it here. He is a to be one of that draft of creatures wizard. He knows more about lep- that once were men, aye, and women, rosy than any living man, and if a like Lucy Mokunui, the epitome of all cure is ever discovered, he'll be that Polynesian charms, an artist as well,

"Good-by, Jack! Good-by!"

I am afraid I must have betrayed my perturbation, for Dr. Georges hastened to assure me that they were very happy down in the settlement.

It was all too inconceivably monstrous. I could not bear to look at her. A short distance away, behind a stretched rope guarded by a policeman, were the lepers' relatives and friends. They were not allowed to come near. There were no last embraces, no kisses of farewell. They called back and forth to one another -last messages, last words of love, last reiterated instructions. And those behind the rope looked with terrible intensity. It was the last time they would behold the faces of their loved ones, for they were the living dead, being carted away in the funeral ship to the graveyard of Molokai.

Doctor Georges gave the command, a little foolish and ashamed of ourand the unhappy wretches dragged themselves to their feet and under their burdens of luggage began to stagger across the lighter and aboard the steamer. It was the funeral prowish I could acquire a flow of lan ession. At once the wailing started from those behind the rope. It was guaga." blood curdling; it was heartrending. I never heard such woe, and I hope never to again. Kersdale and Mc Veigh were still at the other end of the wharf, talking earnestly; politics, of course, for both were head over eels in that particular game. When Lucy Mokunui passed me, I stole a
